RECOMMENDATIONS

Designers recommend that the Contractor and its agents, engineers, and agents, and the manufacturers work closely together to ensure that all aspects of the design, including the recommendations, are met. Designers recommend that the Contractor comply with the following recommendations to ensure that the design complies with all applicable codes, laws, standards, and regulations.

CONCRETE

All concrete shall be cast in accordance with the American Concrete Institute (ACI) specifications. All concrete mixtures shall be designed by a licensed engineer and shall be cast in accordance with the American Concrete Institute (ACI) specifications. All concrete mixtures shall be designed by a licensed engineer and shall be cast in accordance with the American Concrete Institute (ACI) specifications.

ALL RECOMMENDATIONS SHALL CONFORM TO THE ADHESIVE MANGANESE FOR DETAILS CONCRETE.

WOOD FRAME

All wood framing shall be designed and constructed in accordance with the National Design Specification for Wood Construction. All wood framing shall be designed and constructed in accordance with the National Design Specification for Wood Construction. All wood framing shall be designed and constructed in accordance with the National Design Specification for Wood Construction.

STEEL

All steel shall be designed and constructed in accordance with the American Institute of Steel Construction (AISC) specifications. All steel framing shall be designed and constructed in accordance with the American Institute of Steel Construction (AISC) specifications.

DESIGN LOADS

From 45 SPF, live load, 45 SPF, dead load, and 45 SPF, dead load, each and every part of the structure shall be designed and constructed in accordance with the American Institute of Steel Construction (AISC) specifications.

MISCELLANEOUS

The governing rules shall govern all necessary supplementary specifications to locate existing and new buildings and their associated components. All supplementary specifications shall be designed and constructed in accordance with the governing rules. All supplementary specifications shall be designed and constructed in accordance with the governing rules.

GENERAL NOTES

All exposed insulation material shall be installed in accordance with the governing rules. All exposed insulation material shall be installed in accordance with the governing rules. All exposed insulation material shall be installed in accordance with the governing rules.

NOTICING AND BORING STUDY:

All boring and sampling shall be conducted in accordance with the governing rules. All boring and sampling shall be conducted in accordance with the governing rules. All boring and sampling shall be conducted in accordance with the governing rules.
